Summary

Computer Science undergraduate (CGPA 9.05/10) who architects full-stack and AI-powered applications end-to-end – from REST APIs and relational databases to speech-processing pipelines. Automated workflows that cut manual effort by up to 40% and shipped features used by 1000+ people. Strong foundation in data structures, algorithms, and cloud technologies (AWS Certified); seeking to bring this builder's mindset.

Education

SRM Institute of Science and Technology, Chennai *2023 – 2027*

Bachelor of Technology in Computer Science and Engineering – Software Engineering **CGPA: 9.05/10**

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming

Technical Skills

Programming Languages:	C, C++, Python, Java, SQL, JavaScript
Computer Science:	Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Database Systems, Computer Networks
Web Development:	HTML, CSS, React.js, Node.js, Express.js, REST APIs
Databases:	MySQL, PostgreSQL, Relational Database Design
Cloud & Tools:	AWS, Git, GitHub, Jupyter Notebook
Data & Analytics:	Pandas, NumPy, Matplotlib
AI / ML Tools:	Whisper.cpp, Ollama, Hugging Face

Projects

PennyAI – Multilingual AI Financial Assistant *Python, Whisper.cpp, Ollama, Hugging Face, MySQL*

- Architected a multilingual AI-powered financial assistant using Python, Whisper.cpp, Ollama, and Hugging Face models, cutting manual financial-query resolution time by 35%.
- Built a speech-to-text pipeline to process financial queries and generate automated budgeting recommendations for 100+ users.
- Improved financial literacy accuracy by 30% using machine learning insights and designed a multilingual interface supporting 3+ languages.

Brain Tumor Segmentation Using ResUNet *Python, Deep Learning, ResUNet*

- Developed a ResUNet-based deep learning model to segment brain tumors from MRI scans.
- Preprocessed MRI images and tumor masks for effective model training.
- Evaluated segmentation performance using Dice Score and IoU.

Learnscribe – Assistive Learning Platform *React.js, Node.js, Express.js, MySQL, MediaPipe, Whisper.cpp*

- Built a full-stack accessible learning platform adopted by 200+ learners using React.js, Node.js, Express.js, and MySQL.
- Integrated speech recognition, gesture detection, and lip-movement analysis, improving accessibility for users with speech and hearing impairments and boosting task-completion rate by 25% via MediaPipe and Whisper.cpp.
- Delivered secure authentication and personalized learning modules, increasing engagement and progress-tracking accuracy by 30% through REST APIs and database integration.

Achievements

- **Won First Place** – Innovatrix Hackathon 2025, ACM-W SRM
- **Earned Best Product Idea** – Ossome Hacks 2.0, GitHub Community SRM
- **Won EdTech Track** – Ossome Hacks 2.0
- **Advanced to Internal Round** – Smart India Hackathon 2024

Certifications

AWS Certified AI Practitioner
AWS Certified Cloud Practitioner
Oracle Certified Foundations Associate
Salesforce Certified Agentforce Specialist
Cybersecurity Essentials – Tata STRIVE
MATLAB Image Processing – MathWorks

Leadership Experience

Class Representative *SRM Institute of Science and Technology*

- Led academic communication between faculty and 50+ students, streamlining issue resolution.

Committee Member *SRM Hackathons and Challenges*

- Led logistics, sponsorship outreach, and event coordination for coding competitions drawing 1000+ participants.
